DESCRIPTION

Soar's Chem Trail is a high-THC indica cross of Lemon OG x Chemdawg. This heavy-hitting cultivar from our gas collection features pungent gassy aromas layered with notes of mint, citrus and a sweet cereal finish from terpenes caryophyllene, limonene and ocimene. The dense buds are bright and sticky, generously coated with sugary trichomes.

We are selective and disciplined in our process. Grown in smaller batches and carefully sorted to ensure only our best buds make it through.

Hand-harvested, hang-dried and hand-detailed with a humidity pack in every bag.
