The **CANNATM CZAR**

The legacy twax blunt that started it all

The Canna Czar is a five-layer 2.1 gram blunt, hitting at 32-38% THC, featuring:

- ★ Fresh ground flower
- ★ A golden shatter snake
- ★ Slow-burning hemp blunt paper
- ★ THC distillate coating
- ★ Chilled kief crust
- ★ A natural hemp wick for lighting

WHAT IS TWAXING?

A West Coast legacy term that means adding concentrates to your joint or blunt.

The Canna Czar is so special, there's even a unique way to light it. Follow step-by-step or sit back and watch how it's done. 

1. Light one end of the hemp wick away from the blunt.
2. Using the hemp wick, light the end of the blunt. Rotate slowly to evenly ignite.
3. Let the flame catch on the blunt and burn for approximately 30 seconds.
4. Blow out the flame and inhale.

Learn more about how this handcrafted blunt is made in this video.
